

## Opportunities Available in the Healing Arts

If you answered “no” to several of these questions, you may be better suited for an alternative healing career. Even if being a Hands-on Healer is not for you, there are still many opportunities available to you in the healing arts.

The following career pathways and areas of study are simply suggestions. You will notice that I have provided links to resources for you to check out in some categories and not in others. This is because I am not professionally affiliated with any of these organizations for teachers. I’m simply providing options to explore in order to pique your interest and show you the wide variety of learning that is available. I’m giving you my first hand recommendations for a few categories where I have trained personally.

See what modalities catch your attention and make you want to know more. Explore each career path that intrigues you.

**You can combine many of these therapies into one professional offering.**

## Let's review career options.

Read through this list slowly. Notice that I've included careers in traditional medicine. We desperately need balanced, healthy and happy healers serving in the medical field. We also need healers to care for the doctors and nurses who suffer from burnout.

Do any of these career possibilities make you feel excited as you read them?

Notice how you feel as you read this list. What sparks you?
